

André Ricardo Vargas da Silva Junior

Machine Learning Engineer | Data Scientist

andrevargas.com.br

andrevargas22@gmail.com

andrevargas22

Summary:

Machine Learning Engineer based in Brazil with experience developing and deploying Machine Learning solutions. Skilled in cloud architectures, CI/CD, production deployment of models and APIs, and Data Science. Focused on leveraging MLOps practices to enhance scalability, efficiency, and reliability in Machine Learning projects.

Recent Work Experience:

Grupo Casas Bahia

- **Machine Learning Engineer Specialist | August/24 – Present**
 - Migration of tables and pipelines from Azure to Google Cloud Platform (GCP)
 - Development of a new CI/CD pipeline using GCP Databricks and Airflow

Stefanini Brasil – Banco do Brasil

- **Senior Data Scientist | January/24 – July/24**
 - Development of credit risk models to estimate the probability of an asset becoming problematic.
 - Development of managerial market projection models for Banco do Brasil.

Falconi Consultores S.A.

- **Machine Learning Engineer | January/23 – December/23**
 - Cloud architecture for Machine Learning systems.
 - Implementation and deployment of models and APIs in production.
 - Best practices for CI/CD and test-driven development.
 - Deployment of the MLFlow server on Google Cloud.
 - Creation of digital assets (templates, libraries, repositories) to accelerate the progress of projects.
- **Data Scientist | March/22 – December/22**
 - Development of Machine Learning models (supervised and unsupervised).
 - Coding of data apps and libraries to leverage work in projects.

Education:

- **Mechatronics Engineering | 2011 - 2017 | Universidade de Brasília, Brazil**
 - Exchange Program | Sep/14 – Aug/15 | Cardiff University, United Kingdom
 - Graduation Project: “Design and Prototyping of a Portable USB Charger for Easyglic, a Non-Invasive Device for Hypoglycemia Detection”

Technical Skills:

• Machine Learning & Model Deployment:

- MLFlow
- Databricks
- H2O (AutoML)
- Airflow

• Web Development and APIs:

- HTML
- CSS
- Javascript
- Flask
- FastAPI
- Streamlit

• Data Science and Analysis:

- Python
- SQL
- Spark

• Cloud Services and Machine Learning Operations (MLOps):

- Google Cloud Platform (GCP)
- Microsoft Azure
- Amazon Web Services (AWS)
- Docker
- Kubernetes
- GitHub Actions

Project Management Methodologies and Tools:

- Agile
- Scrum
- Kanban
- JIRA
- Confluence
- Trello

Languages:

Portuguese (native)

English (fluent)

Spanish (advanced)
